We are pleased to introduce You our new web site, dedicated to the measuring systems. We'll do our best to keep site regularly updated with most current and interesting information about solutions, program, regulation etc.

Due to scope of supply, we have linked to the main site [www.measurement-solutions.net](http://www.measurement-solutions.net) "sub" sites (related sites), dedicated to each individual and special field of work as [termometer.net](http://termometer.net) (dedicated to thermometers), [haccpdata.com](http://haccpdata.com) dedicated to haccp solutions etc...

We cover measurements and systems, their realization, including virtualization and automation of processes. We consult and offer solutions at all phases from manufacturing to storage and reselling at all fields of work as medicine, pharmacy, chemistry, biology, food and agriculture technology etc...

In order to achieve monitoring, alarming and controlling we use various types of instrumentation and equipment as:

- measuring/controlling wireless based equipment
- measuring/controlling GSM and LAN based equipment
- local digital data loggers and measuring devices
- level indicators, process indicators, counters

We offer complete solutions based on specific requirements as:

Applications: industry, food and drug industry, pharmacy, HVAC, clean room, server room, storehouses, shops, laboratories

type of measurements: temperature, humidity, flow, level, vibrations, accelerations, pH, state

special requirements: FDA, HACCP, EN12830, 21CFR PART11, GAMP

communication: data loggers, LAN, GSM, GPRS, Wireless
